

User Acceptance Testing (UAT)

Date	05 AUG 2026
Student Name	P. Srujan Sinha
Project Name	Intergalactic Space Travel Request (ISTR) System
Maximum Marks	4 Marks

Project Overview

Project Name: Intergalactic Space Travel Request (ISTR) System

Project Description: A ServiceNow scoped application automating mission request submission, multi-level approval, role-based security, notifications, and reporting for intergalactic space missions.

Project Version: v1.0

Testing Period: 21 Jun 2026 to 27 Jun 2026

Testing Scope

Features and functionalities tested:

- Mission Request submission via Service Catalog (Record Producer)
- Multi-level approval workflow (Manager → Finance → Mission Control)
- Role-based access control (ACLs, Roles, Groups)
- Email notifications on state changes
- Mission Analytics dashboard and reports

User stories tested: USN-1 through USN-12 (see Project Planning Phase document).

Testing Environment

URL/Location: ServiceNow Personal Developer Instance (Australia region) – Service Portal → Mission Request catalog

Credentials: Role-specific test accounts (Requester, Manager, Finance Officer, Mission Control, Admin) provisioned on the PDI

Test Cases

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Submit a new mission request as a Scientist	1. Open Mission Request catalog item 2. Fill mandatory fields 3. Click Submit	Request created with state = Submitted, confirmation email sent	Request created and email received as expected	Pass
TC-002	Manager approves a valid request	1. Open pending request as Manager 2. Review details 3. Approve	State moves to Manager Approved; routes to Finance if budget-flagged	State updated and routed correctly	Pass
TC-003	Finance Officer rejects an over-budget request	1. Open Finance-flagged request 2. Reject with comment	State = Rejected; requester notified with reason	Requester received	Pass
Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail

				rejection email with comment	
TC-004	Mission Control gives final approval	1. Open Finance-approved request 2. Approve as Mission Control	State = Approved; spacecraft auto-assigned	Spacecraft assigned correctly	Pass
TC-005	Requester views only their own requests	1. Log in as Requester 2. Open request list	Only own records visible	Only own records shown, as expected	Pass
TC-006	Admin views Mission Analytics dashboard	1. Log in as Admin 2. Open dashboard	Pending/Approved/Rejected widgets show correct counts	Counts matched underlying records	Pass

Bug Tracking

Bug ID	Bug Description	Steps to Reproduce	Severity	Status	Additional Feedback
BG-001	Diplomatic Officer field remained visible after switching Mission Type away from Alien Negotiation	1. Set Mission Type = Alien Negotiation 2. Change to Research 3. Observe field	Low	Closed	Fixed via UI Policy reverse-if condition
BG-002	Notification email sent twice on rejection	1. Reject a request 2. Check requester inbox	Medium	Closed	Fixed by removing duplicate notification trigger on Business Rule

Sign-off

Tester Name: Dil

Date: 27 Jun 2026

Notes

- All test cases cover both positive and negative scenarios (valid submissions and blocked invalid ones).
- Bug tracking includes severity, status, and reproduction steps for traceability.
- Sign-off obtained prior to considering the ISTR application ready for evaluation/submission.
